

低リンタイプ無電解ニッケル/炭化ケイ素複合めっき液

Low-phosphorus Type, Electroless Nickel/Silicon Carbide Composite Plating Solution

トップニコジットLPSC

TOP NICOSITE LPSC

析出皮膜は、耐摩耗性に優れている

Excellent in abrasion resistance

リン含有率が1~3wt%と低く、硬度が高い

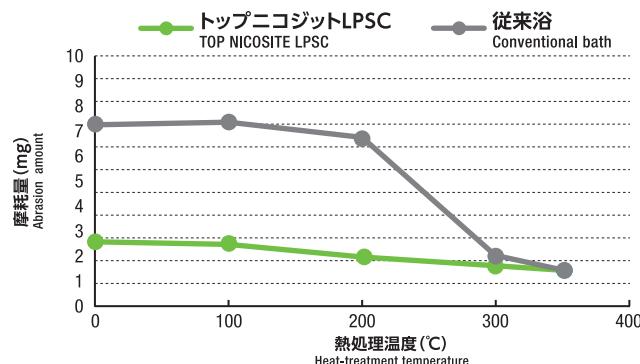

High hardness comes available Phosphorus ratio: 1 to 3% by weight

析出皮膜はHv700で、熱処理によりHv1000以上の硬度が得られる

Film hardness: Hv 700 (as deposited), over Hv 1,000 (after heat treatment)

優れた耐摩耗性

Excellent in abrasion resistance

測定機器 Tester

スガ摩耗試験機 NUS-ISO3
Suga abrasion tester

スガ試験機株製
Made by Suga Test Instruments Co., Ltd.

荷重 Load

1.5kgf(14.7N), #600

往復回数 Reciprocating-motion times

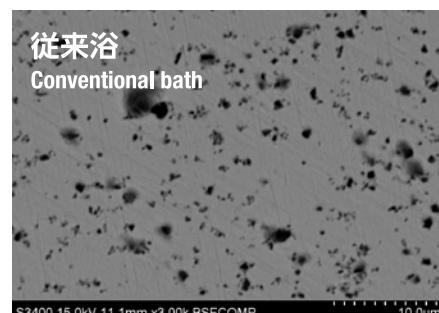

300回 times

熱処理温度と摩耗量の関係

Relationship of heat-treatment temperature and abrasion amount

従来浴と同等以上の均一な析出

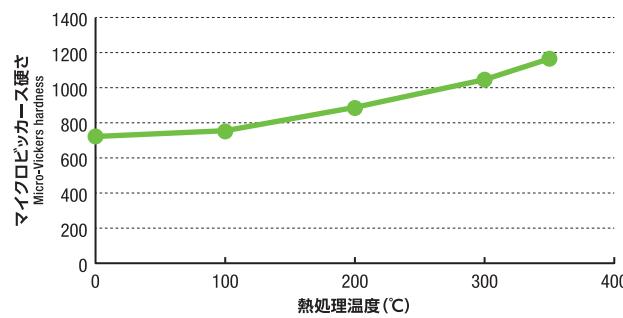

Improve deposition uniformity from conventional bath

めっき皮膜の断面SEM像
Cross-sectional SEM image of deposit

高い硬度

Great hardness

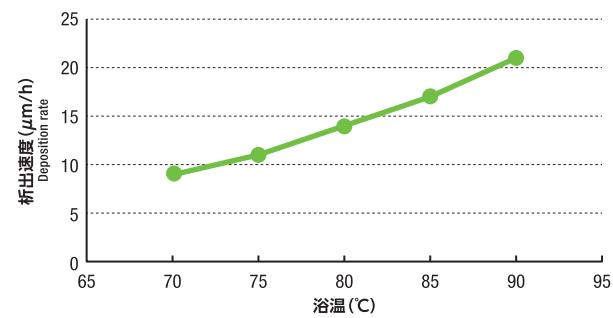

熱処理温度と皮膜硬度の関係

Relationship of heat-treatment temperature and film hardness

析出速度が優れる

Excellent in deposition rate

浴温と析出速度の関係

Relationship of bath temperature and deposition rate
