

炭素繊維強化プラスチック(CFRP)用めっきプロセス

Plating Process for CFRP (Carbon Fiber Reinforced Plastic)

トップTFACプロセス

TOP TFAC PROCESS

- CFRP (炭素繊維強化プラスチック) へめっきを施し、付加価値を付与
Plating on CFRP (Carbon Fiber Reinforced Plastic), give added values
- 耐摩耗性の向上
Improve wear resistance
- 意匠性の向上
Realize various designs, appearances
- 耐光性の向上
Improve light resistance

処理工程

Process

CFRP

CFRPは、鉄・アルミより軽いながらも強靱な樹脂素材です
本プロセスは今後の展開が期待されます

CFRP is an advanced material for various purposes because
CFRP is lighter than iron or aluminum, also have great toughness.
